Ruud Selles: Combined Session

Ruud Selles obtained his MSc in Human Movement Science, Free University Amsterdam and his PhD in Rehabilitation Medicine from the Erasmus University Rotterdam in 2002. After a fellowship at the Rehabilitation Institute of Chicago, he now an associate professor at the departments of Rehabilitation Medicine and Plastic Surgery at the Erasmus MC.

Ruud Selles leads a research group on hand surgery and hand rehabilitation with interests in musculoskeletal disorders, ultrasound imaging, clinical outcome studies, clinical study design and neurorehabilitation. His main fields of application are disorders of the upper extremity, especially hand arthrosis, Dupuytren’s disease, carpal tunnel syndrome and stroke. Together with Xpert Clinic, Ruud has developed a system for routine outcome measurement with the aim of improving both clinical care as well as allowing high-level clinical research on comparative effectiveness, clinical prediction modelling and clinimetry using this data set. He has authored over 120 peer-reviewed publications, supervised more than 25 PhD students and received numerous grants for his research.
